

Microprocessor controlled, spot-welding machine suitable for use in the car body repair and industrial field. The digital, multifunction control panel allows the automatic regulation of spot welding parameters according to the chosen tool and sheet thickness. Characteristics: automatic identification of the tool * monitoring of mains voltage * automatic control of the clamp and cable cooling * choice of optimal spot-welding current according to mains power. Equipped with water cooled pneumatic clamp, water cooling system and trolley.

AUTOMOTIVE

Norms: LVD: EN 50063
