

VISION 180 MMA/MIG-MAG/TIG HELMET

Overview

VISION 180 MMA/MIG-MAG/TIG HELMET

cod. 804097

Automatic helmet mask ideal for MMA, MIG-MAG and TIG welding with external darkening adjustment (DIN 3/4 ÷ 8/8÷12).

The LCD liquid crystal filter darkens automatically when the welding arc is running and quickly returns to its transparent status when the arc is switched off; this means the operator does not need to lower and raise his mask during operations and allows him to work with both hands free.

The True Color Technology allows the realistic color perception also during welding operations.

The 180 ° viewing area increases the visibility of the operator during work, improving comfort in every welding position.

It is not only fitted with a filter sensitivity adjuster depending on the welding process being carried out, but also has an external adjuster which can delay the time between darkening and lightening phases when the arc welding has been completed, according to the level of brightness of the piece. It implements also the grinding mode.

Features:

- adjustable automatic darkening filter,
- True Color Technology,
- 180° viewing area,
- optical class 1/1/1/1,
- 4 independent sensors,
- dark-light delay and sensitivity adjuster,
- TIG from >2 A,
- Grinding mode,
- solar cell powered,
- light and comfortable to wear.

Optional:

cod.804103 External glass protection 390x150 mm Kit 2 pcs

cod.804104 Internal glass protection 89x180 mm Kit 2 pcs

cod.804099 Sweatband.
